REMARKS

Ben,

Apropos of our conversation about programmer overstaffing.

Bill

2. ADDA				Attached are the data I promised on programmer personnel and positions. As you can see, although we are in fact overstrength by 4 programmers, 18 of those on board are in positions bearing other designations or as yet undesignated. In the best of all worlds, I suppose, every programmer would have a programmer position, but in the real world we must expect a continuation of the present situation in which various components house their programmers where they can. The designation of the slot does not control the requirement for the incumbents' talents as a computer programmer.
